

SAMPLE QUESTION PAPER

**XI (IB)
BIOLOGY**

SECTION A

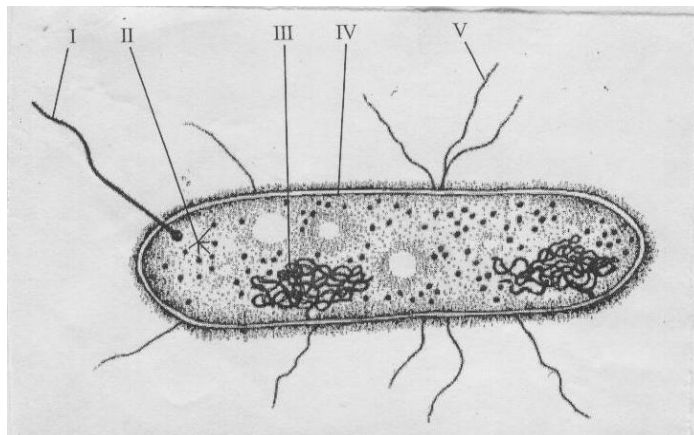

1. Which structure(s) is /are present in both animals cells and plants cells?

- I. Plasma membrane
- II. Ribosomes
- III. Cell wall

- A. I only
- B. I and II only
- C. II and III only
- D. I, II and III

ANSWER	
--------	--

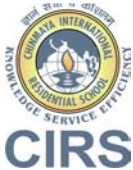

The following diagram of a prokaryote refers to questions 2 and 3

2. What is the function of structure II?

- A. Passing of hereditary information to offspring
- B. Movement of the organism
- C. Regulation of the entry and exit of materials
- D. Production of proteins

ANSWER	
--------	--

CHINMAYA INTERNATIONAL RESIDENTIAL SCHOOL, COIMBATORE

SAMPLE QUESTION PAPER

3. Which structures are found in all eukaryotic and prokaryotic cells?

- A. I and II only
- B. II and IV only
- C. II and V only
- D. III and V only

ANSWER	
--------	--

4. What term refers to a community and its abiotic environment?

- A. Biosphere
- B. Ecosystem
- C. Habitat
- D. Niche

ANSWER	
--------	--

5. Which organisms externally digest dead organic matter and then absorb the nutrients?

- A. Autotrophs
- B. Detritivores
- C. Heterotrophs
- D. Saprotrophs

ANSWER	
--------	--

6. Which factor(s) is/are essential for evolution to occur within a population ?

- I. Inheritance of characteristics
- II. Variation in the population
- III. Natural selection

- A. I only
- B. I and II only
- C. II and III only
- D. I, II and III

ANSWER	
--------	--

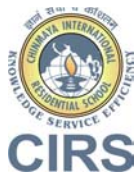

SECTION B

7. Who is known as the 'Father of Taxonomy'?

8. In which plant did Gregor John Mendel perform his experiments on genetics?

9. Name the organism which is a connecting link between reptiles and birds.

10. Enumerate any four salient points of Darwin's Theory of Evolution.

CHINMAYA INTERNATIONAL RESIDENTIAL SCHOOL, COIMBATORE

SAMPLE QUESTION PAPER

11. What are 'endocrine glands'? Give two examples.

SECTION C

12. Differentiate between excretion and egestion.
13. Discuss the significance of pollination in flowering plants.
14. Describe the journey of a food particle from the time it is taken into the mouth till reaches the cells and tissues and the unwanted materials are removed out of the body.

SECTION D

15. Draw the structure of a DNA molecule. Also mention how DNA differs structurally from RNA.
16. Define Reflex action and make a schematic representation of the Reflex arc.
